

QUARTZITE

Audacia

Type	Quartzite
Finish	Polished
Color family	Gray
Origin	Brazil
Sealing	Confirm requirements for the selected stone

Audacia is a Brazilian quartzite distributed in the US by MSI, quarried in Brazil and characterized by a blend of beiges and greens with touches of charcoal and black. Geologically it is a true quartzite: an old quartz sandstone recrystallized by metamorphic heat and pressure into a dense, interlocking quartz matrix that resists scratching and acid etching better than granite. The Latin-rooted name 'Audacia' (audacity/boldness) is an evocative trade name for the stone's confident coloring.

CARE & INSTALLATION

Clean with warm water and a stone-safe cleaner; wipe spills promptly and use trivets. Sealing needs depend on the selected stone and its use; confirm the care schedule with us. Slab movement and tone vary from swatches. Confirm the actual slab, finish and thickness before fabrication.
