

QUARTZITE

Blue Roma

Type	Quartzite
Finish	Polished
Color family	Blue
Origin	Brazil
Sealing	Confirm requirements for the selected stone

Blue Roma is a Brazilian quartzite distributed in the US by MSI, mined in Brazil and featuring a deep blue background accented by striking copper veins. Like all quartzite, it originated as a quartz-rich sandstone that recrystallized under intense heat and pressure into an extremely hard stone that resists scratching and etching far better than granite. The 'Roma' name is an evocative nod to Italian elegance rather than a place of origin, paired with 'Blue' for its signature color.

CARE & INSTALLATION

Clean with warm water and a stone-safe cleaner; wipe spills promptly and use trivets. Sealing needs depend on the selected stone and its use; confirm the care schedule with us. Slab movement and tone vary from swatches. Confirm the actual slab, finish and thickness before fabrication.
