

QUARTZITE

Calacatta Montreal

Type	Quartzite
Finish	Polished
Color family	White
Origin	Brazil
Sealing	Confirm requirements for the selected stone

Calacatta Montreal is a Brazilian quartzite offered by MSI, quarried in Brazil and characterized by a harmonious blend of white and gray tones with a refined vein structure reminiscent of Calacatta marble. It is a metamorphic quartzite that formed when quartz sandstone recrystallized under heat and pressure into a dense, hard surface with strong scratch and etch resistance, outperforming granite. The trade name marries 'Calacatta' (for the marble-like appearance) with 'Montreal' as an evocative label rather than a geographic source.

CARE & INSTALLATION

Clean with warm water and a stone-safe cleaner; wipe spills promptly and use trivets. Sealing needs depend on the selected stone and its use; confirm the care schedule with us. Slab movement and tone vary from swatches. Confirm the actual slab, finish and thickness before fabrication.
