

QUARTZITE

Cirrus Gray

Type	Quartzite
Finish	Polished
Color family	Blue
Origin	Brazil
Sealing	Confirm requirements for the selected stone

Cirrus Gray is a Brazilian quartzite distributed by MSI (also known in the trade as Tordilho), quarried in Brazil and known for sweeping charcoal waves accented by deep ebony veins. As a quartzite it formed when an ancient quartz-rich sandstone was recrystallized under heat and pressure into a hard, interlocking quartz rock that resists scratching and etching better than granite. The name 'Cirrus' likens its soft, wispy gray banding to high cirrus clouds.

CARE & INSTALLATION

Clean with warm water and a stone-safe cleaner; wipe spills promptly and use trivets. Sealing needs depend on the selected stone and its use; confirm the care schedule with us. Slab movement and tone vary from swatches. Confirm the actual slab, finish and thickness before fabrication.
