Fantasy Macaubas (also marketed as Macaubas Fantasy) is a Brazilian quartzite from Brazil's quarries, known for a varied palette that blends cool steel-blues and greens with warm terracotta, rust, and gold tones over a gray background. It is a true quartzite, formed when quartz-rich sandstone recrystallized under heat and pressure into a hard, dense stone that resists scratching and etching far better than granite. The name pairs 'Fantasy' (for its dramatic, fantastical color movement) with 'Macaubas,' tying it to Brazil's Macaúbas quartzite district.

CARE & INSTALLATION

Clean with warm water and a stone-safe cleaner; wipe spills promptly and use trivets. Sealing needs depend on the selected stone and its use; confirm the care schedule with us. Slab movement and tone vary from swatches. Confirm the actual slab, finish and thickness before fabrication.
