

QUARTZITE

Gray Canyon

Type	Quartzite
Finish	Polished
Color family	Gray
Origin	Brazil
Sealing	Confirm requirements for the selected stone

Gray Canyon is a Brazilian quartzite distributed by MSI, quarried in Brazil and featuring icy whites, grays, and creams with charcoal veins and a hint of green. It is a metamorphic quartzite, formed when an ancient quartz sandstone recrystallized under heat and pressure into a hard, dense surface that resists scratches and etching far better than granite. The name 'Gray Canyon' evokes the layered, carved look of canyon rock rather than the stone's actual Brazilian quarry.

CARE & INSTALLATION

Clean with warm water and a stone-safe cleaner; wipe spills promptly and use trivets. Sealing needs depend on the selected stone and its use; confirm the care schedule with us. Slab movement and tone vary from swatches. Confirm the actual slab, finish and thickness before fabrication.
